PROFILE

Growth marketer with expertise in social media and early-stage startup growth. My work has generated 300M organic short-form views and built me a personal following of 60,000 on TikTok — including 23K followers gained in 7 days. Recently I grew Piñata Farms AI by 70,000 users through content; my best short-form video for them produced \$16,000 in revenue. Experienced in AI, startups, identifying opportunities to capture markets, execution, and people. My work ethic is intense and goal-oriented — including the USA bench press national record. I thrive in fast-paced environments with important problems to solve. Willing to relocate: anywhere.
