

Privacy Policy for Commercial

Last updated: May 29, 2026

This Privacy Policy explains how the **Commercial** mobile application ("the App," "we," "us") handles your information.

Who we are

Commercial is developed by **Viral Builders** ("the developer"). You can reach us at viralbuildersllc@gmail.com.

TL;DR

- We do not collect your name, email, phone number, or contacts.
- The apps and categories you choose to block are managed by Apple's Screen Time framework on your device. We do not see them, store them, or transmit them anywhere.
- We collect anonymous usage analytics: a random ID for each install, which referral source you select during onboarding ("A card," "TikTok," etc.), and timestamps of when you open the app. This data is not linked to your identity.
- We show ads from Google AdMob. AdMob may collect a device-level advertising identifier and basic usage data to serve and measure ads. You control this with the standard iOS tracking prompt.

What information we collect

Information you provide to us: None. Commercial does not have user accounts, sign-up, or any forms.

Anonymous usage analytics we collect:

We track some basic analytics so we know who the app is working for. It goes to our own database (hosted on Supabase) and is **not** shared with advertisers or anyone else.

- A random anonymous ID that lives on your device. It's not tied to your name, email, phone, or Apple ID. Uninstall the App and it's gone.
- Which option you picked when we asked how you heard about us ("A card," "A friend," "TikTok," "YouTube," "Instagram," "Facebook," or "Other").
- How often you open the App.

Information collected automatically by third parties:

- **Google AdMob** is integrated into the App to show rewarded video advertisements. AdMob may receive:
- Your device's advertising identifier (IDFA), only if you grant permission via Apple's App Tracking Transparency prompt
- Approximate region (derived from IP)
- Device type, operating system version
- Ad interaction events (impressions, clicks, video completion)

AdMob's data practices are governed by [Google's Privacy Policy](#) and AdMob's terms.

Information that stays on your device:

- The list of apps and categories you choose to block, your unlock-duration setting, and your ad-count setting are stored locally using Apple's `FamilyControls`/`ManagedSettings` frameworks. These never leave your device and we have no access to them.

How information is used

The third-party data described above is used by Google AdMob to:

- Serve advertisements (including personalized ones, if you allowed tracking)
- Measure ad performance
- Pay the developer for served ads

We do not combine or analyze AdMob data ourselves.

Sharing

We do not sell your information. The only third parties that receive any data from the App are:

- **Google AdMob** — for serving advertisements (see above).
- **Supabase** — our anonymous analytics database provider. Supabase stores the anonymous identifier, referral source, and session timestamps described above on our behalf. We do not authorize Supabase to use this data for any other purpose.

Affiliate links

The App contains an Amazon affiliate link (for buying an NFC card). As an Amazon Associate, Viral Builders earns from qualifying purchases. Using the link does not change your price; it just helps cover the cost of building the App. The link does not send Amazon any information beyond what your browser/operating system would send when you visit any webpage.

Your choices and rights

- **Tracking:** You can deny tracking at any time via Settings → Privacy & Security → Tracking → Commercial. Ads will still serve, but they will be non-personalized and lower paying.
- **Deletion:** Uninstalling Commercial from your device removes all locally stored data, including your blocked-apps list.
- **AdMob:** You can manage Google ad preferences at adssettings.google.com.
- **California, EEA, UK residents:** You have additional rights under your local laws (access, deletion, correction, portability, opt-out of "sale" or "sharing" — note we don't sell or share data outside what's described above). Contact viralbuildersllc@gmail.com to exercise any right.

Children

Commercial is not directed to children under 13. We do not knowingly collect data from anyone under 13. If you believe a child has used the App, contact us and we will help.

Security

We do not host any user data on our own servers, which limits the surface area for breaches. AdMob applies its own industry-standard security practices.

Changes

We may update this Privacy Policy from time to time. Material changes will be reflected by updating the "Last updated" date above. Continued use of the App constitutes acceptance.
